# **3100 SERIES** STANDARD HIGH CAPACITY RP PAINT ARRESTORS

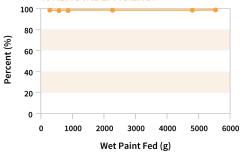

**OVERVIEW:** This product has all the characteristics of the 3000 Series, but is designed to hold up to twice the overspray before changing is required. This double service life makes this series ideal for high production applications and wherever a large volume of coating is applied in a relatively small booth space. The longer service life results in less down time, fewer change overs and greater economy. The product is ideal for heavy, tacky coatings or slower drying finishes, but it is not recommended for quick dry lacquer type coatings. Efficiency is increased when assembled in tandem to 99.39%.
