

SmartConnect

BATCH OVEN APP

The RTT SmartConnect App provides the ability to remotely view oven status when the control panel is connected to an active internet connection. SmartConnect provides the ability to monitor temperature, process time remaining, elapsed time, system faults or burner status remotely. With the SmartConnect app you can receive email and/or text notifications for batch complete, oven temperature out of range, system faults or preventative maintenance with a yearly subscription (free for the first year). The subscription also provides email updates with temperature and batch time reports. SmartConnect is simple and easy to use with user-friendly screens that mirror the oven touch screen panel. The app can be accessed using any Android, PC or Apple device.

Features

Efficient

- Reduces downtime by tracking oven temperature and out of range occurrences
- Temperature reporting to document proper curing
- Remotely monitors batch time remaining and temperature maximizing process throughout
- Retrieves temperature and time data for quality control
- Monitors burner status (on/off/fault) to reduce quality defects

Cost Saving

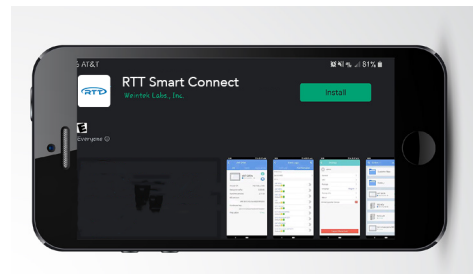

- Reduces operating costs, maintenance costs and increase uptime with notifications sent via text or email with yearly subscription (free for first year)
- Remote troubleshooting with real-time input/output status ability
- View real-time data from anywhere with SmartConnect on any Android, PC or Apple device
